

Installation Instructions

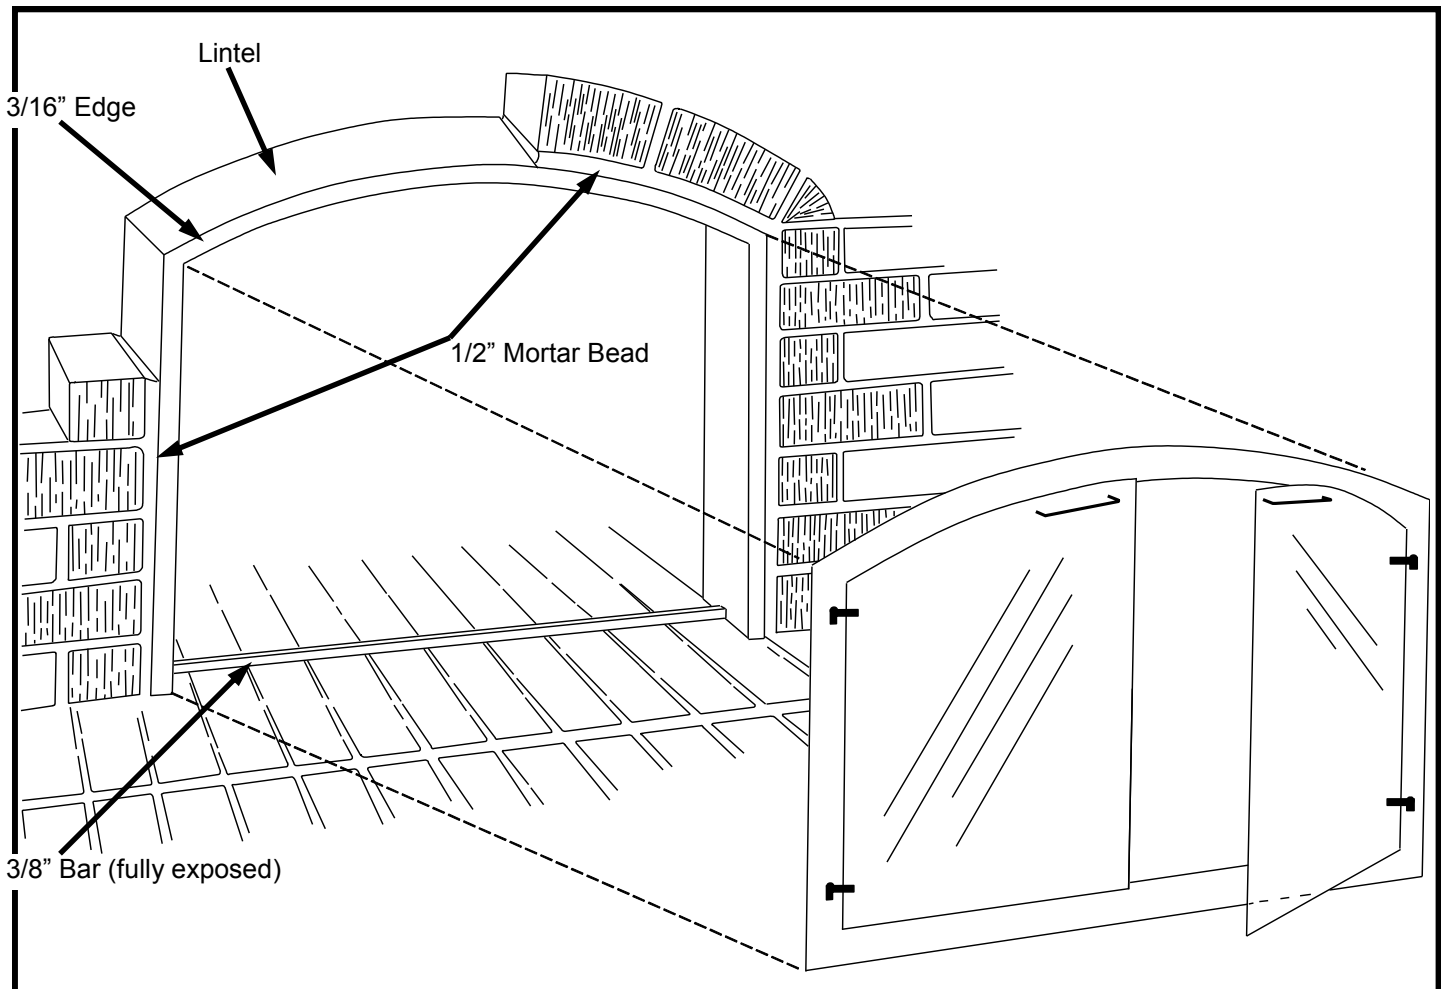

INSTALLATION

1. Center lintel in fireplace and level. **Make sure the 3/8" bar rests on top of the finished hearth.** (The exposed bar will be covered after the fireplace glass enclosure is installed.)

▲ WARNING: Do not sink 3/8" bar! The fireplace glass enclosure design for this lintel will not fit!

2. Build your brick or stone evenly up both sides and across top. **Leave a 1/2" mortar bead around outer lip to create a smooth surface for the glass enclosure to lay up against.**

NOTICE: It is important that the 3/8" bar is fully exposed and the outer lip has a 1/2" mortar bead around it, to insure a tight fit of the glass enclosure to the lintel.

WARNING

This product can expose you to chemicals including Carbon Black, which is known to the State of California to cause cancer.
