<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>8 ea. Pressure Screws</td>
<td>1 ea. Allen wrench for tightening Pressure Screws</td>
</tr>
</tbody>
</table>

**PLEASE NOTE:** Your Stoll ZC Glass Doors must be installed and adjusted correctly.

Misalignment of the enclosure frame can cause improper latching of the glass doors, glass breakage, and/or improper operation. Please read and follow the installation instructions carefully. If you do not feel confident that you are equipped to complete the installation properly please contact your Authorized Stoll Dealer to arrange professional installation.

**If you have questions:**
Please contact your Stoll Fireplace Dealer or Stoll Fireplace, Inc. before proceeding with installation.

**INSTALLATION:**

- Carefully remove the glass doors from the ZC ReFace Enclosure to make the it lighter for installation and to help prevent damage to the glass doors and the finish.
  
  **NOTE:** Frameless TotalView doors are not shipped installed. They will be found packaged in cardboard inside the master shipping carton.

- Remove the optional Cabinet Mesh Screen Doors from the enclosure if they were ordered.
  - If Hanging Mesh Screens were ordered, instructions for installing them are packed with the screens.
    - The mesh screen panels will be packed flat between layers of cardboard. **Be careful not to discard the screens accidentally.**
  - Set aside all of the parts removed in a safe place.

- Remove any protective plastic film from any polished metal trim or overlay material on the ZC Glass Door frame or doors if applicable.

- Start the Pressure Screws into the mounting tabs on the back side of the ZC Glass Door frame.

- Check that the ZC Glass Door frame is aligned level, straight, and square.

- Replace the Glass Doors. Discard the shipping hinge screws if used. Use the color-matched permanent hinge pins that are taped to the glass doors if needed. **NOTE:** Some door styles use hinges that do not need separate hinge pins.

  **NOTE:** If the glass doors do not close properly or do not lay flat against the frame, the frame is most likely twisted. Loosen the pressure screws on the side of the frame opposite the glass door that is away from the frame. Move the bottom corner of the frame out until the doors line up properly. Retighten the pressure screw(s).

  **NOTE:** Failure to align the ZC Glass Doors properly may result in glass breakage or other damage directly attributable to improper installation.

- Replace the Stoll Mesh Screen Doors if they were ordered with the ZC Glass Door.

  **NOTE:** If your are using the OEM screens that are part of the ZC-Fireplace make sure that they operate freely with the ZC Glass Door securely mounted. See CAUTION above.

**MAINTENANCE:**

- Closing the glass doors to secure a dying fire may result in smoke residue or soot accumulation on the glass. If cleaned regularly this staining can be removed using glass cleaner or a mild household cleaner. Avoid cleaners that contain ammonia. Spray on, let soak for a few minutes, and wipe clean. Repeat as necessary.

- Heavier, long-term build up may require the use of a glass cleaner specifically formulated for removing wood smoke residue. These glass cleaners are available from your local Stoll Fireplace Dealer. Never use oven cleaner.

- Stoll uses high quality, heat resistant, Powder Coat finishes on ZC Glass Doors. This type of finish requires only an occasional wipe with a damp cloth to maintain the factory finish. A mild household cleaner may be used if necessary. Do not use cleaners that contain ammonia. Do not use harsh, strong, or abrasive cleaners.

- Polished metal parts of the enclosure (brass, copper, etc.) have a clear lacquer finish to prevent tarnishing. Wipe with a damp soft towel or dust cloth only. The use of metal polish or strong cleaners will damage the finish.

A WORD ABOUT ENERGY:

Keep your glass doors closed when the fire is out.

Fireplaces are designed to draw air and smoke up the chimney. Even when the fire is cold the warm air created by your heating system is going up the flue. It is equivalent to having a one square foot hole in your roof. Closing the fireplace damper helps, but most dampers do not close tightly. Closing the glass doors is like closing your storm door.

If you have vented gas logs installed the fireplace damper is fixed open at all times. Closing the glass doors in your fireplace enclosure will close off 99% of the fireplace opening and help stop the loss of heated room air up the chimney.

In some cases the chimney flow reverses and cold air is pulled down the chimney. This is quite common in well insulated homes. Turning on the kitchen vent hood or a clothes dryer pulls cold air in through the fireplace. Glass doors help stop the cold drafts. For more serious down-drafting Stoll makes Air-Seal doors that are gasketed for a better seal.

So keep those glass doors closed any time you are not enjoying a warm fire on your hearth.

Five Year Limited Warranty for Masonry Fireplace Enclosures

Stoll Industries warrants its Masonry Fireplace Enclosure to be free from defects in metal materials and/or workmanship, under normal use and conditions of service, for a period of five (5) years, subject to the limitations outlined below. Glass is warranted to be free from defect in materials, under normal use and conditions of service, for a period of one (1) year, subject to the limitations outlined below. This warranty is non-transferable and is extended exclusively for the benefit of the original purchaser beginning on the original date of retail sale. Stoll Industries will, at its option, repair or replace any part that fails due to a defect in materials or workmanship at no charge (exclusive of freight) subject to the limitations of this warranty.

This warranty covers repair or replacement of parts only and applies exclusively to products purchased for consumer use. This warranty does not cover damage caused by transportation and/or handling or which results from alteration, accident, misuse, abuse, or improper installation. It also makes no warranty as to maximum temperature and stresses which may cause discoloration of metal finishes, distortion of metal parts, and/or glass breakage.

This warranty constitutes the entire warranty with respect to Stoll Industries and/or its products. Stoll Industries shall not be liable for consequential or indirect damages which are caused by defects in its product, by its repair or replacement. Stoll Industries makes no other warranty, expressed or implied, including any warranty of merchantability, or warranty of fitness for a particular purpose. IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE WHICH MAY ARISE UNDER STATE LAW ARE ALSO LIMITED IN DURATION TO FIVE YEARS FROM THE ORIGINAL PURCHASE OF THIS PRODUCT. SOME STATES DO NOT ALLOW SUCH LIMITATIONS, IN WHICH CASE THIS LIMITATION MAY NOT APPLY. THE CONSUMER MAY HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE.

If, during the warranty period, a product covered under this warranty proves to be defective in material or workmanship, a claim for warranty service should be made through your authorized Stoll Industries Dealer. Proof of purchase will be required. The authorized dealer will procure replacement parts and/or contact Stoll Industries if additional service is deemed necessary.

If you have questions about your product or the terms of your warranty please contact:

Stoll Industries ~ 153 Hwy 201 ~ Abbeville, SC 29620

When applying for warranty replacement, or ordering replacement parts, always specify the type of product, the color, the height, and width. Describe the damaged or defective part in detail. Please provide digital pictures if possible.
